

## Isocrete Takes Multiple Wickets at Dubai Cricket Ground

• Product: Isocrete K-Screed • Market Sector: Stadia • Location: UAE • Client: Dubai Cricket Stadium  
• Date: 2008

Dubai takes its place on the world cricket stage with the arrival of the first Twenty20 Tournament to be held in the UAE at the new Dubai Cricket Stadium.

With top teams from India, Pakistan, Australia, England, South Africa and West Indies battling it out in the sensational format of 20 overs per high octane match, the new stadium will play host to a series of nail biting games.

The 25,000 seat stadium features state-of-the-art facilities including a high-tech, no shadows lighting system that will enable matches to be played in the cooler evenings.

Flowcrete's high strength Isocrete K-Screed was selected for installation over a 35,000 m<sup>2</sup> area in order to provide a strong and durable footing for final floor finishes.

The fast-curing, quick-drying properties of Isocrete K-Screed minimised disruption to the overall schedule with the reduced water content of K-Screed providing added strength and durability.
