

Flowcrete's Deckshield Drives Up At Tropicana Mall, Malaysia

Located in one of the busiest suburbs of Malaysia's cosmopolitan capital Kuala Lumpur, the new Tropicana City Mall offers a vibrant and hi-tech environment for retailers, business users and shoppers alike. Developed by Dijaya Land Sdn Bhd, the upmarket neighbourhood Mall is located in the heart of the bustling city suburb known as Petaling Jaya and provides a mix of retail space and office towers, all housed in a modern complex complete with an eye-catching glass frontage. In keeping with the contemporary environment, the entire car parking area, comprising 2,200 bays, has been installed with Flowcrete's specialist car park decking system Deckshield, to deliver a bright, pleasant ambience.

As Flowcrete's Director of Sales Desmond Sin explained, the client selected Flowcrete's polyurethane Deckshield system over an epoxy system following visits to a number of Flowcrete reference sites around Kuala Lumpur. "The client was able to see first hand the performance of Deckshield and that it was the most appropriate system for Tropicana City." Deckshield's waterproof properties, high durability and gloss finish with ease of cleaning were among the factors that finalised the selection. "Also, with our manufacturing and installation operations under the one Flowcrete umbrella, we were able to provide a single source warranty, a further comfort factor for the client," added Mr Sin.
