

Deckshield Driving Pleasure At Dubai Marina Mall

• Product: Deckshield • Market Sector: Car Parks • Location: UAE
• Client: Dubai Marina Mall • Date: 2009

Featuring over 150 retail outlets, Dubai Marina Mall is located at the heart of the Dubai Marina Development, designed as an awe-inspiring city within a city right on the waterfront.

A total of 68,000 square metres of Flowcrete's hard-wearing polyurethane Deckshield ID has been used as the deck coating for the unique circular multi-storey car park.

One of the only systems of its kind to be certified to the stringent American Standards Testing Specification ASTM C957, Deckshield's ability to bridge dynamic cracking will help prolong the lifespan of the surface and minimise maintenance.

The special exposed deck formulation will protect against the harsh sunlight while the profiled anti-slip surface minimises tyre squeal. Deckshield's superior chemical resistance also prevents damage from petrol, diesel or brake fluid spillages.

In addition, Deckshield has a highly accredited fire rating and is available in a wide-range of attractive colours and finishes – with the option to create bright demarcation lines and signage, which help to regulate traffic movement and leave a welcoming impression on vehicle users.
